

CAUTIONARY NOTICE ON RELEASE OF EXCESS WATER FROM DAMS

Panaji September 19, 2017

Bhadra 28, 1939

Major dams like Salauli and Anjunem and minor dams like Amthane, Pachwadi, etc have filled up and the excess water will be released downstream into the river. In case of Anjunem dam, efforts are made to regulate the flow by releasing water into rivers at low tides.

There is a forecast of incessant rains in the State which may increase the inflow into the reservoirs or rivers. Hence the public is warned not to venture into the rivers as there is a possibility of sudden rise in levels of the rivers in case of rains of heavy intensity.
