

SPECIFICATION OF VERTICAL S.S. SLIDING DOOR

The vertical sliding door is used between clean and dirty areas in hospitals, pharmaceuticals etc.

The sliding door is mounted on an external wall opening. The door is made of stainless steel counter-balanced by built-in counterweight. The door is provided with nylon wheels at the side for easy of movement. The door is made along with stainless steel cover plates for the wall opening.

The door is provided with a built in safety lock which ensures the door from closing if the counterweight rope breaks.

TECHNICAL DATA

- Wall thickness : 115mm
- Wall opening : 500mm x 500mm
- Free opening : 500mm x 500mm
- Bottom of wall opening from floor recommended : 900mm
- Dimension of door with fittings : 650mm x 1250mm
