

CHILDREN TO BE VACCINATED FROM [MARCH 16](#)

[March 15, 2022](#)

Phalguna 24, 1943

The National Covid vaccination programme has administered 180 crore vaccine doses of covid 19 vaccine. The State of Goa has administered 26,37,399 doses of covid vaccine in the State with 100% vaccination of two doses of covid 19 vaccine to people above 18 years and 89% of 1st dose , 75% of 2nd dose to children in the age group of 15-18 years.

The State of Goa as per the guidelines of Ministry of Health & Family Welfare will start the vaccination of children in the age group of 12-14years with Corbevax vaccine from [March 16, 2022 \(Wednesday\)](#).

Children will be given two doses of vaccine intramuscularly with a gap of 28 days.

This vaccination will extend the protection against the covid19 to all the children in above age since the schools have reopened.

Parents are requested to take special initiative and get their children vaccinated.
