PART - B

Speaker Sir, as I have presented the expenditure aspect for various demands, there is equal need to focus on the revenue that the State augments from various sources. In this year, I do not propose to levy any additional taxes on our Goans but I will work thoroughly to get in more reforms in various revenue generating departments. Over these years, I have realized that increasing revenue does not necessarily imply increasing the taxes but also plugging revenue leakages and undertaking reforms which will curtail the expenditure on redundant activities. This year without burdening my Goan brothers and sisters, I will bring in various reforms, rationalize the tax slabs on various components and undertake strict enforcement measures with which I expect to mobilize additional revenue to the State Government. The action on this will be visible in due course of time.
