## **PREFACE**

The impact of price movement not only affects the standard of living of the people but also has a significant bearing on project formulation and investment related decisions. Government as well as Private Organizations/Agencies too depend on Price Statistics for fixation of wages and various other allowances and for its future planning.

The present publication on “Price Trends” being 40<sup>th</sup> in the series, gives the trends in the movement of retail and wholesale prices for some of the essential commodities in Goa State during the year 2022 and also presents the yearly average prices from the year 2017 onwards.

Based on the Index Numbers compiled by this Directorate for the Middle Class Non-Manual Employees with Old Base and Revised Base provided by the Labour Bureau, Shimla for Industrial Workers, the General Index with Old Base (1982=100) and Revised Base (2001=100 & 2016=100), an analysis of the price trends has been attempted.

This publication will hopefully serve as a useful source for the price information needs of all concerned. While all efforts have been made to incorporate authentic price data in the publication, suggestions for further qualitative improvements in future are most welcome.

The generous co-operation extended by various individuals, Shops, Agencies, Government Departments etc. in making available the requisite data is gratefully acknowledged. The Staff working for the Price Division deserves special mention as they have contributed immensely in terms of collection, compilation, computation and finalization of this report.

## **PRICE TRENDS — GOA STATE**

### **INTRODUCTION**

#### **1. GENERAL BACKGROUND**

Goa, which was a Union Territory along with Daman and Diu, was conferred Statehood on 30<sup>th</sup> May, 1987. It is administratively divided into two districts viz. North Goa District and South Goa District with their head-quarters at Panaji and Margao respectively. These districts are further sub-divided into twelve talukas. North Goa consists of five talukas viz. Tiswadi, Bardez, Pernem, Bicholim and Sattari and South Goa comprises of seven talukas viz. Sanguem, Canacona, Quepem, Salcete, Mormugao, Ponda and Dharbandora. As per census 2011, the geographical area of the State is 3702 sq. kms. of which 1736 sq. kms. is covered by North Goa and the remaining 1966 sq. kms. by South Goa. As per the land utilization pattern for the year 2021-22, an estimated 1,25,473 hectares of area is under forest and the net area sown is 1,26,141 hectares. The State of Goa is situated on the West Coast of the India. The State is endowed with rainfall from the South – West monsoon and the rainfall recorded for the capital of the State i.e. Panaji for the year 2022 was 3007.7 mm.

**1.2** The total population of the State, according to the Population Census 2011 was 14,58,545 of which North Goa had 8,18,008 and South Goa 6,40,537. The density of population of the State is 394 persons per sq. km. The density of population in North Goa is 466 persons per sq. km as against 329 persons per sq. km. in South Goa District.

**1.3** The Government implements the Public Distribution System (PDS) in order to control the prices and ensure equitable distribution of the essential commodities to the people at reasonable rates through a number of fair price shops. The scale of ration fixed for distribution for the year 2022 is shown in Table – I.

## **2. CPI NUMBERS - ITS MEANING, SCOPE AND USE**

The Consumer Price Index (CPI) Numbers indicate the average percentage change in the prices paid by the consumer over a period of time with reference to the base period. The average percentage change, measured by the index is estimated on a monthly basis with reference to a fixed period of the index. The index during the base period is taken to be 100 so that the indices for later periods are automatically expressed as a percentage with reference to the base period.

The objective of the index is to measure the effect of price change with reference to a fixed basket of goods and services that form part of consumption. This basket reflects a particular level of living of the population group from the point of view of consumption. Thus, the fixed base period of the index provides uniform reference period for consumption purpose and the fixed basket of goods and services enables measurement of the effect of price change. For example, the Consumer Price Index numbers for the Middle Class Non-Manual Employees of Goa State for the year 2022 was 2174 (Base 1982-83=100) indicating that the cost of a fixed basket of goods and services consumed by the middle class non-manual employees in Goa has increased by 2074 points over the base year (1982-83) prices.

**2.2** The Index does not measure the absolute level of prices, but only indicates the average percentage change in the prices of a fixed basket of goods and services at different points of time.

**2.3** Also, this Index does not measure change in the total expenditure of the population group or in other words, their actual cost of living. It measures the effect of price change only.

**2.4** The cost of living of the population group is influenced by a large number of factors like income, changes in the standard of living, quality of commodities and services consumed, prices, etc. It will be readily conceded that one of the most important factors determining change in the cost of living of the population group is the extent to which the prices of goods and services consumed by them change from time to time. Price and income are co-related. It is so because, if prices go up and income of

the population group remains constant, the population group has to spend more for the same quantum of goods and services and these results in a fall in the standard of living. Conversely, if income increases more than prices, then there is an improvement in the living conditions. Thus, the Cost of Living Index, in the true sense of the term, has to take into account different factors. Consumer Price Index Numbers, therefore, helps us to measure the cost of living.

**2.5** A study of the Consumer Price Index (CPI) will also enable us to estimate the required change in income which is necessary to maintain a given level of standard of living of the population group covered by the Index.

### **3. CPI NOS. FOR THE MIDDLE CLASS NON-MANUAL EMPLOYEES IN GOA STATE**

**3.1** The Consumer Price Index Numbers for the Middle Class Non-Manual Employees in Goa was being compiled by the Directorate of Planning, Statistics and Evaluation since 1966, based on the Family Living Survey conducted in 1965 for Panaji Town. As is well known, the consumption pattern of a given population undergoes radical changes with the passage of time and the series becomes outdated. As such, the Central Statistical Organization, New Delhi carried out a fresh Middle Class Family Living Survey during the year 1982 on a uniform basis throughout the country.

**3.2** A similar survey, on the pattern of the one conducted by the Central Statistical Organization and approved by the Technical Advisory Committee (TAC) on prices and cost of living was carried out by this Directorate during the year 1982–83, with a view to derive the new Weighting Diagram, based on the latest consumption pattern of the middle class families in Goa. In this survey, four different Centre's namely Panaji, Mapusa, Vasco and Margao towns were covered. The methodology and sampling design for this series were decided upon in consultation with the Central Statistical Organization for the purpose of uniformity.

**3.3** The Consumer Price Index Numbers for the Middle Class Non-Manual Employees are being compiled by this Directorate based on the fresh surveys conducted on a weekly and monthly basis. The General and Group wise Index Numbers are given in Table II, for the year 2022. The average yearly indices on Revised Base 1982-83=100 since 2017 are also given in the same table.

#### **4. CPI NOS. FOR INDUSTRIAL WORKERS IN GOA**

**4.1** The series of Consumer Price Index Numbers for Industrial Workers in Goa was being compiled regularly on old Base (1966=100) by the Labour Bureau, Shimla since 1967. Since, it was felt that with the passage of time the consumption pattern of the working class had undergone a change, the old series was replaced by the New Series with base 1982=100 on the basis of a working Class Family Income and Expenditure Survey conducted in the year 1981-82, all over the country. On the basis of the fresh survey conducted in the year 2015-16, the old series was replaced with the latest series with base 2016=100. The price collection work for the new series and revision of new base year series in respect of Goa, is being done by the officials of the Directorate of Planning, Statistics and Evaluation, Government of Goa.

**4.2** The industrial Centre's selected for the survey are Margao, Vasco, Ponda, Panaji and Mapusa. This Index is widely used for regulating the payment of Dearness Allowance to the employees to compensate for the rise in prices. The Dearness Allowance of the employees are either increased or reduced as per the rise and fall of the particular Index with which the Dearness Allowance is linked.

**4.3** The monthly, quarterly and annual Index Numbers are regularly prepared based on the indices released by the Labour Bureau. The average yearly indices on revised base 2016=100 of the Industrial Workers in Goa have been given in Table III for the year 2022.

## **5. WHOLESALE AND RETAIL PRICES**

**5.1 Markets in Goa State:** As stated earlier, the State of Goa is administratively divided into 12 talukas. The head quarter of each taluka is considered as a local market. However, three towns, viz. Panaji, Margao and Mapusa are the important centres for wholesale and retail trade in the State.

**5.2 Wholesale and Retail Prices:** The annual average wholesale prices of important commodities for the year 2022 and their monthly spread for Panaji, Margao and Mapusa towns are presented in tables IV, V and VI respectively. Similarly, average retail prices of selected items of common consumption of Middle class Non-Manual Employees for Goa state are given in table VII.
