Electronics and Communications  
Government of Goa  
2<sup>nd</sup> Floor, IT Hub,  
Altinho, Tiswadi Goa - 403 001, India

No. 10(113)/DITEC/2024/GBBN/Miscel/1092

Date: 05/09/2024

## NOTICE

The Department of Information Technology, Electronics & Communication has planned shutdown at NIC, Goa Mini Data Center on **Monday 9<sup>th</sup> September, 2024** from **2:00 PM to 6:00 PM**.

This shutdown is required to implement an important upgrade to one of our core routers, which has been identified as causing a bottleneck in our internet bandwidth. Currently, the router supports only 1 Gbps, limiting data flow and overall network efficiency. To resolve this issue and enhance performance, we will be upgrading the router to handle up to 10 Gbps.

This upgrade is essential for increasing bandwidth capacity, improving data throughput, and reducing network congestion.

During this planned shutdown, there will be temporary interruptions to internet connectivity and certain services may be unavailable.

Kindly take note of the same & make necessary arrangements (if any).

**Inconvenience is regretted.**
