

APPEALS TO AVAIL BENEFIT OF AAROGYA SETU 2.0

Panaji: July 24, 2026

Government of India has comprehensively revamped the Aarogya Setu application in line with the vision of the Ayushman Bharat Digital Mission (ABDM), transforming it into a citizen-centric digital health application that enables individuals and families to access, manage and monitor their health information and services conveniently.

Aarogya Setu has been repurposed for long-term use within India's growing digital health ecosystem. Aarogya Setu 2.0 was launched by the Union Minister for Health and Family Welfare, Shri Jagat Prakash Nadda, recently.

Further it is also stated that Aarogya Setu 2.0 provides citizens with a simple and trusted gateway to a wide range of digital health services, including ABHA and Digital Health Records: create and access your ABHA and manage your health records digitally; AI-enabled Health Record Digitization: digitize medical documents such as laboratory reports and scanned medical records to create a personalized health dashboard; Personalized Health Management: track health vitals, set goals, receive personalized reminders and connect compatible wearable devices.

In this regards the citizens are encouraged to download and explore Aarogya Setu 2.0 and make use of its digital health services for easier, more convenient and connected healthcare. By adopting these services, citizens can take greater control of their health information and benefit from the growing digital health ecosystem enabled by ABDM informed by the Directorate of Health Services.
